Four-dimensional space - Wikipedia A four-dimensional space or 4D space is a mathematical extension of the concept of three-dimensional or 3D space. Three-dimensional space is the simplest possible generalization of the observation that one only needs three numbers, called dimensions, to describe the sizes or locations of objects in the everyday world. Four-Dimensional Geometry -- from Wolfram MathWorld Four-dimensional geometry is Euclidean geometry extended into one additional dimension. The prefix "hyper-" is usually used to refer to the four- (and higher-) dimensional analogs of three-dimensional objects, e.g., hypercube, hyperplane, hypersphere. The Fourth Dimension and Non-Euclidean Geometry in Modern ... The Fourth Dimension And Non-Euclidean Geometry In Modern Art is an essential book for anyone interested in the intersection between science, mathematics and culture. It offers a riveting chronicle of the emergence of the idea of the fourth dimension in math, its popularization in literature and its adoption by the world of art that has persisted until the present day.

The Geometry of the Fourth Dimension and the Space-Time ... The Geometry of The Fourth Dimension While the first three dimensions including line, square, and cube are all geometries, how can the fourth dimension alone be just a "time"? According to Albert Einstein's space-time continuum, time is the fourth dimension. The Fourth Dimension and Non-Euclidean Geometry in Modern ... In this groundbreaking study, first published in 1983 and unavailable for over a decade, Linda Dalrymple Henderson demonstrates that two concepts of space beyond immediate perception—the curved spaces of non-Euclidean geometry and, most important, a higher, fourth dimension of space—were central to the development of modern art. The Fourth Dimension: Toward a Geometry of Higher Reality ... The fourth dimension is to three-dimensional space as the third dimension is to two-dimensional space. 4-D:3D::3-D:2-D. This particular analogy is one of the oldest head tricks known to man. Plato was the first to present it, in his famous allegory of the cave.
