That Makes Cents: What is the "Four Percent Rule ... Four percent of \$500,000 is \$20,000 " that's the amount you can safely withdraw from your retirement savings each year. Assume also that your company has an actual pension plan independent of a 401k plan that's scheduled to pay you \$18,000 yearly and that your Security Benefits pay another \$19,000 each year. Four Percent Rule - Investopedia BREAKING DOWN 'Four Percent Rule' The 4 percent rule helps financial planners and retirees set a portfolio's withdrawal rate. Life expectancy plays an important role in determining if this rate will be sustainable, as retirees who live longer need their portfolios to last longer, and medical costs and other expenses can increase as retirees age. The FourPercentRule Retirement Calculator Welcome to FourPercentRule.com Retirement Calculator. What makes our calculator different? 1. Ease of Use: The easy slider controls and instant graph updates makes it very easy to experiment with lots of different settings. 2.
